

How Automation Technology Helps to Save Cost

"Every business has been facing the global economic pressure to increase their profitability. The downside of uncertain economic condition would make the cost of doing business become higher and higher"

Unbelievable Hidden Cost of Paper

10,000 Sheets

of paper used by employee in a year, about **1,410** of those are unnecessary

\$80

per year per employee. It also adds up to **\$6** for handling and distributing paper

Moreover, it hasn't included the cost for each lost document and for recreation of the document

Cost Reduction in Digitisation

Automation

technology is a better approach for cost reduction that cut-down the entire day-to-day process

By Digitizing

the manual paper forms it means you can save **\$80+** per year per employee

No need more papers and waste a lot of money and time on the slow process of submitting paper forms
